

# DINSE 25 / DINSE 35

These are the industry standard Dinse 25 and Dinse 35 used to connect TIG torches to your welding machine dependent on its functionality and the torch you are using. Refer to the charts below for the proper connector to match your machines setup.

*Note: These connectors are for non-gas-thru dinse style machines—if you have any questions regarding which connector to purchase please call or email us for help.*

**DINSE 25**  
(3/8" 9.5mm)

**DINSE 35**  
(1/2" 12.8mm)
